Real Estate Valuation Experience

We have years of experience valuing institutional assets such as office towers, shopping centers, industrial complexes, apartment buildings, condominium or cooperative buildings, self-storage properties, marinas, land and mixed-use developments.

We work seamlessly with our Business Valuation, Cost Segregation and Machinery and Equipment experts to provide a full suite of services to our clients. In fact, many clients choose Marshall & Stevens because we can value the full array of assets and liabilities within our firm. Not many firms offer that full range of expertise.

We are experts in Discounted Cash Flow Analysis. We understand the need to support our key conclusions to deliver transparency through our reports so the client can fully understand the valuation results.

Our professionals are experts in identifying problems and solving them: we have been called upon by our clients to solve complicated tax issues involving the IRS and relied upon by our clients to assist with their auditing processes.

We utilize analytic models to study the markets in which we work. Our trend line reports show graphically the trends that are developing within these markets, covering rents, vacancy, absorption and new deliveries.

About Marshall & Stevens
